

DATASHEET

STEEL HD [®]

COR-TEN

Technical information

Composition : High strength S355 steel. COR-TEN style steel delivered as raw black steel. Thanks to the improved atmospheric corrosion resistance of the steel, the edging will form a rust like appearance over 18 to 36 months with out attacking the structural integrity of the steel and hence retaining its strength and form but also preventing any rust run off from the steel.

Advantages :

- 4/5mm thick steel for hard landscaping and heavy loads.
- Long life span and resistant.
- To be sealed in concrete or anchored into the ground
- Ideal for the separation of two hard surfaces
- Easy to install
- 1 double coupler and 2 anchoring pegs supplied with each edge
- Optional accessories : single couplers and anchoring pegs customizable between 0 and 3 per each 3lm lengths.

Specifications

Length	Height	Thickness*	Double coupler	Anchoring pegs 600 x 80 x 10mm
